Selectmen's Report

It is incumbent on the Selectmen to provide to the constituency a report of their efforts, accomplishments and failures of the previous year and their view for the future. The details of the previous year may be found elsewhere in the Town Report and from the reports of the Town Manager and his several department heads.

In recent practice the Selectmen's Report has looked to the future and outlined the choices in policy that are to come before the Town Meeting. Had this report been prepared prior to the budget hearings we would have indicated, in a hopeful tone, that far reaching projects were to be voted on, i.e. the Sewer Treatment Plant, the Carrie White Farm purchase, the Ross Corner project and revaluation. The Federal and State funding for these projects would have been outlined . . . now running over \$800,000 of it will be lost to Derry forever. The Town Meeting will not be allowed to debate and decide these weighty matters. The Budget Committee has not allowed these issues to come before you.

Based upon the evidence of what the Town will be allowed for a budget in 1978, the Selectmen must report to you that no progress can be made on some of the major problems which beset our community.

We hope that you will show your concern and we appeal to you to become part of the Town Meeting process to give advice and direction to your Selectmen. Our government can succeed only if we are united in accomplishing what the Town Meeting deems to be in the best interests of our community.

Respectfully submitted,
/s/Frederick A. Tomkins

(After discussion the following ensued.)

THE MODERATOR. Is there anyone else who wishes to speak on Mr. Fouchy's motion? If not, all those in favor signify by saying Aye. Opposed No. It is a vote in the affirmative and I so declare. Mr. Payne.

MR. PAYNE. I would like to make one correction to the town report, page 6. Al Conservation Commission it has one name, page 6 of the white pages. It has a Richare True, Mr. True was replaced over a year ago by Mary Lee Daley.

THE MODERATOR. Are you just bringing that to the attention of whoever set up this report?

MR. PAYNE. It is just a typographical error, I am sure.

THE MODERATOR. Mrs. Ferland.

MRS. FERLAND. Pauline Ferland. I wish to make a motion at this time to direct the Selectmen that as the present contract with the participating surrounding towns for ambulance service expires that the rate be increased to a minimum of \$30.00 in town calls and \$45.00 for out of town calls.

MRS. WOODSIDE. Seconded.

THE MODERATOR. Seconded by Mr. Woodside.
(After discussion the following ensued.)

MR. WOODSIDE. Move the question.

THE MODERATOR. All right. The question has been moved. All we have to do is get a revote anyway.

MRS. CASTEN. Seconded.

THE MODERATOR. All those in favor of moving the question say Aye. Opposed. All right. Now we will vote on Mrs. Ferland's motion. To direct the Selectmen that as the present contract with the participating surrounding towns for ambulance service expires that the rates be increased to a minimum of \$30.00 for in town calls, \$45.00 for out of town calls. All those in favor of Mr. Ferland's motion signify by saying Aye. Opposed. No. It is a vote in the affirmative and I so declare the motion carried. Mrs. Lovejoy.

MRS. LOVEJOY. Mr. Moderator, I would like to make a motion on all petitions for ballot votes that they have a minimum of 25 signatures and they be passed into the Moderator 24-hours prior to a town meeting.

MR. MCDONALD. Seconded.
(After discussion the following ensued.)

THE MODERATOR. I think, Mrs. Lovejoy, on the ruling of town counsel as I see it I will rule that motion out of order.

MR. WOODSIDE. I will second it.

THE MODERATOR. Mrs. Johnson.

MR. JOHNSON. Mr. Moderator, I would like to offer, I don't know whether this is a motion, but this section of town meeting has always traditionally been reserved for recognizing people who are no longer in office or who have done a good job. And I would like to take this opportunity directing this to Mr. Gaines who is no longer on the Board of Selectmen because I always found him to be fair and courteous in his dealings with me as a member of the Town and I think honestly that he tried always to do the best as he could in the situation according to the way he believed that situation and understood that situation.

MR. COMPOS. Mr. Moderator.

THE MODERATOR. Mr. Compos.

MR. COMPOS. Mike Compos. I would move at this time that we appoint a Goals committee to continue the studies that were started last year. We started our studies at approximately the same time as the Town Government Study and found that we too had too little time to do what was an adequate job. I would move that we appoint the committee, that we have the committee started by the first of May and that they submit a report in sufficient time so that they can be printed in the next warrant and any Goals that we should so bring forth be able to be brought before the people at this time.

THE MODERATOR. Is there a second.

MRS. HEMEON. Seconded.

MR. TOMPKINS. Point of clarification, excuse me. Do you mean by we, the Selectmen appoint a committee?

MR. COMPOS. Yes, we the town, the Selectmen.

(After discussion the following ensued.)

THE MODERATOR. All those in favor of Mr. Compo's motion to create the Goals committee by May 1st, by the Selectmen signify by saying Aye. Opposed. It is a vote in the affirmative and I so declare.

MRS. CASTEN. Mr. Moderator, I would like to have a resolution or whatever it may be to charge our Legislators or five Legislators to do six, all right, well, I see three here. All right, to institute or try to institute Legislation relative to Mrs. Lovejoy's motion in the beginning so that no one can submit a petition just before a vote of town meeting. That a petition must be signed by 25 people and that it must be submitted thirty days before the town meeting.

THE MODERATOR. Thirty days, that would be before the Warrant.

MRS. CASTEN. All right. Twenty-four hours.

THE MODERATOR. Is there a second on that motion?

THE MODERATOR. Is there a second on that motion? Mr. McDonald has seconded.

(After discussion the following ensued.)

THE MODERATOR. All those in favor of Mrs. Casten's motion or resolution signify by saying Aye. Opposed, No. The resolution is defeated. Mr. Anderson.

MR. ANDERSON. I am making a motion that the Board of Selectmen form a committee either of themselves or a committee so designed by them for a study of other towns which presently use a Department of Public Works and towns of similar size with both the pro and the cons of expenses and positions which are involved in establishing such a department, the approximate cost that it would cost the Town to run such an umbrella department and the benefits which the town would or would not receive as a result of having such a department established and to come back to the town meeting next year and give us an intelligent report so that when funds are requested we can intelligently grant or deny such funds.

MR. WOODSIDE. Seconded.

THE MODERATOR. Would everybody kindly listen to this motion because I can't repeat it verbatim.

MR. ANDERSON. I explained it in detail and now I am going to abbreviate it for you, one line. I am requesting, I am making a motion that the Board of Selectmen be directed to establish a committee for the purpose of studying other towns which currently utilize an umbrella department entitled, The Department of Public Works and make a report to the town meeting next year regarding the specifics such as costs etc., so that we can intelligently vote as to whether to grant or deny funds for that purpose.

MR. WOODSIDE. I seconded that motion.

THE MODERATOR. All those in favor signify by saying Aye. Opposed. No. I will take a hand vote. All those in favor please raise your hands.

(Whereupon a hand count was taken on the motion by Mr. Anderson.)

THE MODERATOR. The results of the hand count, Yes, 44; No, 30. I will declare the motion passed.

MRS. CASTEN. I think we ought to thank Judge Joe Stancik for the excellent job he has done over these years and put it into the record here because he chose not to run.

(Applause.)

THE MODERATOR. Mr. Collette.

MR. COLLETTE. I just wanted to thank Carolyn Johnson for the fine job

she did on the Planning Board for the last year. I would also like to thank Floyd Myers, Richard Beaulieu, Louie Martin and Peter Payne for the good job they did.

MR. FERLAND. How would you people be interested in a Saturday assume we start at 9:00 a.m. and continue it until it gets done as far as I am concerned because it gets done in Salem. I make a motion that we have next town meeting at 9:00 a.m. on Saturday morning-- I make a motion we go from 9:00 to 6:00 on Saturday following the election.

MR. WOODSIDE. I will second that.

THE MODERATOR. Could I just explain Mr. Ferland's motion. As I understand it, it is to order or tell the Selectmen that by the vote of this meeting that we want our Town Meeting the first Saturday after the town elections and we would like to start at 9:00 in the morning and go to 6:00 at night. If we don't finish then we can leave it up to the meeting right then, if we don't finish then we can go to the following Monday night and then take Sunday off and finish it up in a day or two and not go over two weeks. Anyone want to speak on it.

(After discussion the following ensued.)

MRS. WILLIS. When Mr. Ferland stated that motion I thought he was going to say start at 9:00 and then when you restated the motion you said from 9:00 to 6:00. What happens if we get done at 1:00, for instance, in some happy way.

THE MODERATOR. What I am saying is that Mr. Ferland said he would go along with the 6:00.

FROM THE FLOOR. No, he changed it.

THE MODERATOR. So we moved that Mr. Ferland's motion is to direct the Selectmen that we want to start our town meeting next year at 9:00 in the morning on the first Saturday following the election. All those in favor signify by saying Aye. Opposed. It is a vote and I so declare. I would just like to say that I would like to thank Mr. Zollar who was my assistant Moderator for every night except tonight, Mr. Gerrish tonight for helping through this and through the election, helping with the ballots and everything, the ballot clerks we used here and the counters and before I let anybody make a motion to adjourn I would just like to read, I think this is kind of appropo; we the undersigned petition a secret ballot to adjourn. Signed by Mr. Fouchy, Mr. Gould, Mrs. Janes, Mr. Donovan, Mr. Quimby, Mr. Compos and Mr. Reinhardt.

I will entertain a motion to adjourn.

MRS. HEMEON. I move the motion we adjourn.

THE MODERATOR. Mr. Lyons moves we adjourn seconded by Mrs. Hemeon. All those in favor signify by saying Aye. I declare this meeting adjourn.

(Whereupon at 9:40 p.m. on March 16, 1977 the 1977 Derry Town Meeting was herewith adjourned.)

Town Manager's Report for 1977

The spirit of unity and cooperation that developed during the 1976 Bicentennial Celebration did not carry over to 1977 in Derry. The community's penchant for looking to the courts solutions to what are essentially political problems did not approve to be fruitful except for the lawyers. As a matter of fact, few if any of the legal actions have produced court decisions. It becomes evident that legal actions are not brought to gain a decision but to force a delay. If that is the purpose of bringing lawsuits then that cause has been well served. The Budget Committee case for removal of the Town Manager and several Selectmen for alleged over-expenditures of the Town Budget is now over a year and one half old has been heard by two judges and neither judge has given the Town a decision. The Sullivan sewer capacity case is at least that old and has not yet produced a court decision on whether the Town does or doesn't have sewer capacity. This indecision is in spite of days of testimony and representation of the various developers interested in sewer capacity by some of the best attorneys in the State. Three subsequent conferences of these six attorneys with the Judge also have not resolved the problem.

The Budget Committee's second lawsuit challenges the passage of Warrant Article No. 23 in March 1976, which was approved by majority vote and declared passed by Moderator Joseph Stancik. It appropriated \$297,000 for Sewer Treatment Plant Design (Step II). This challenge was based on the Sullivan case court testimony of Frederick LaPlante, Director of the Revenue Administration, who testified that RSA 33:7-B required a $\frac{2}{3}$ vote to apply for and receive federal aid for a capital outlay project. This court action has not only caused the delay in the Treatment Plant Design project for which work has been shelved, but it also terminated the efforts to obtain an \$86,000 H.U.D. Community Development Block Grant for the Carrie White farm acquisition and the Department of Resources and Economic Developments offer of an \$18,750 Bureau of Outdoor recreation grant for four new tennis courts in the Alexander-Carr Park on Birch Street. This slowdown in municipal service development projects is regrettable for a growing community such as Derry, but as long as opposing factions are so litigious, the delays are unavoidable.

Fortunately, we have no lawsuits standing in the way of the operating departments in providing their programs. This has been a banner year for the Park and Recreation Department's

programs which have grown by leaps and bounds in terms of participants, teams and programs. Five of the six rooms in the Westside Community Center have been remodeled; the old floats at Hood Pond have been replaced and the Veterans Field Softball backstop has been relocated to enlarge the diamond to better accommodate the many softball teams that use the field.

The Highway Department had another successful year with its road reconstruction and hottopping programs. Northshore Road (Beaver Lake) was rebuilt and overlaid; Kendall Pond Road was overlaid and the third section of Tsienneto Road was widened and hot-topped from Barkland Drive to Scenic Drive. Recycling program improvements were made at the Sanitary Landfill which have begun to return some revenue to the Town from glass, tin, scrap metal and paper. It also helps extend the life of the Sanitary Landfill by reducing the volume of recyclables that are being buried in our growing "Mount Trashmore".

The Water and Wastewater Department's progress this year was hampered by a lack of funds and poor delivery on ordered equipment. They did close several loops along Crystal Avenue and connected an 8" main from Fordway to Wyman Street along West Broadway. The 800 g.p.m. water pump at the Fordway pumping station was ordered but not delivered or paid for in 1977 and the relocation of the Water Storage Tank level controls from the Holmes Street tank to the new two million gallon water storage tank on the hill above Treasure-masters has been ordered but not delivered or installed. System maintenance of pumping stations, valves, hydrants, meters, the aerators, chlorination station and lagoon controls have been their prime area of effort.

The Police Department made important progress in 1977 with its new communications center, public lobby, Broadway entrance and records area. The L.E.A.A. funded (50:50) police communications recording system was installed and put into operation this year and has been a good control device and protection for the four new civilian dispatchers approved by Town Meeting and hired in 1977.

The Department also instituted a new team patrolling system that has certain officers assigned to patrolling certain areas of the community. This new patrol system will be evaluated after operation for a year. During 1977, the Town reached a landmark agreement with the local Police Officers' Union (I.B.P.O.). The Police Chief and Town Manager represented the Town in negotiations with the Officers representing their

bargaining unit. There is no need to detail the provisions of the contract but it is important to indicate that the Board of Selectmen were deeply involved in the process and not only signed the final agreement in May 1977, but met at length before agreeing to the compromise settlement that led to that agreement.

The Town Manager also was extensively involved in the collective bargaining negotiations with the Highway and Water/Wastewater Department Manual Trades employees who are represented by the American Federation of State, County and Municipal Employees. The Road Agent and Water/Wastewater Superintendent also participated in the negotiations.

The process went to impasse, factfinding, mediation and an unfair labor practices hearing before the State Public Employees Labor Relations Board. Town Counsel was involved in the latter process. The PELRB ordered us back to the bargaining table. After several more months of negotiations a settlement for a two year contract was agreed to by both parties with a reopener for cost items for 1978. The agreement only had 17 months to run, but it was retroactive to April 1, 1977. Salaries were increased by the 5.3% approved in the 1977 Budget by the March Town Meeting. Standby-pay of \$5 per day was approved and the Water/Wastewater Department employees reduced their scheduled overtime from 30 hours per week to 11 hours per week as part of that settlement. Binding arbitration of grievances was the key issue that delayed the contract for 14 months and the Board of Selectmen ended up agreeing to a local appeal for grievance arbitration.

It would be stretching the truth to say that the accomplishments in 1977 made the Town Manager's job satisfying. It has been a struggle to keep the town from falling behind in its efforts to cope with its growth and increasing demands for services.

Too often politics and factionalism were evidently more important than what might be for the benefit of the Town and the improvement of its services to the public in the future. What has made the job worthwhile is the positive spirit of Department Heads and other Town employees who work diligently to serve the public to the best of their ability in spite of limited resources provided to accomplish their assigned tasks. Town employees may get the feeling that they are second class citizens of the community, but to a large degree they perform their jobs in a first class manner.

Respectfully submitted,

Frank C. Carlton
Town Manager

Report of the Highway Department

1977 has been our most ambitious Road Program year to date.

We completed overlay/resurfacing projects on Aiken Street, Clark Street, Valley Street, Dolores Avenue, Paul Street, Doris Street, Gregoire Street, North High Street, Kendall Pond Road, High Street, Lawrence Road, Tsienneto Road, North Shore Road (Beaver Lake) and Elm Street. We also resurfaced portions of Maple and Thornton Streets and hot topped a parking area for the Boys Club.

Liquid asphalt sealing was completed on Pingree Road, West Broadway, North Shore Road (Island Pond), English Range

Road, Beaver Lake Road, Bartlett Road, and Goodhue Road.

Other roads were patched or leveled with hot top at this time with future plans to be reconstructed, widened, aligned or resurfaced depending on their condition. Sidewalks were completed on High Street and Franklin Street.

Culvert pipe for drainage purposes was installed on Sunset Ave., Paul Street, North High Street, Drew Road, High Street, North Shore Road (Beaver Lake), and Bradford Street. A 30" culvert was added at a stream crossing Kendall Pond Road, and Two 30" culverts were added on Tsienneto Road near the junction of Route 102 where flooding has often occurred.

Snow removal during 1977 seems almost forgotten since the more recent "Storms of the Century" during January and February of 1978. However, 1977 gave us a record snowfall where Town crews worked long hours to clear our streets and highways. Once the roads were clear, our crews worked to push back the snow banks and open drains and catch basins during the daytime. Then, in the midnight hours, they returned to work to load and haul snow from the main streets and the business district. Snow removal is done during those hours to avoid traffic problems.

Our efforts to provide an *increasing* level of service at a minimum cost continues to become more difficult as additional vehicular traffic and new subdivision streets are added to our responsibility. We must hold the costs on maintenance of approved streets where a few years ago there were a couple of farms, and now the entire street frontage is dotted with new homes.

Our successful efforts to hold costs involves requiring subdividers along our Town roads to upgrade Town facilities such as drainage, lines of sight, widening of streets, and other items as necessitated by virtue of the proposed subdivision. In this way much necessary expense generated by the subdivider is paid for by that subdivider. Likewise our Driveway Access Regulations require that work done to provide a safe access by a builder be provided by the builder.

Extensions of new streets are done by the subdivider under strict inspection of the Road Agent resulting in *no* construction costs to the taxpayer. Likewise, proposed new street construction provides escrow release only upon satisfactory completion of the work.

Cooperation between departments has contributed to the expediency with which we have been able to complete our programs. We are grateful to the Town Manager, Building Inspector, Planning Board and Water Department for their cooperation.

George H. Blanchard,
Road Agent

Derry Police — 1977

Time, it has been said, waits for no man. Will Derry have been caught up in the race of today, and, with the Town, so goes the police department?

We have been engaged in new and different means of providing you, the taxpayer, the best possible police protection. To this end, over the past year, we have partially remodeled our police station so that now you enter from the front of the Adams Memorial Building instead of the rear as has been since Day One. We have constructed a

communications room making a much more efficient system. To enhance the operation, last year you voted to provide us with four dispatchers whose sole duties are within this room. They serve as the link between the officer in the field and Headquarters, an important position.

We are presently deploying our men in a Team Policing concept.

Team policing does not mean two or more policemen working together at the same time as many people had at first believed. Team policing, which is a totally new way of providing police protection for Derry, comes to us from history--the days of "the cop on the beat". Remember? We have assigned certain officers to work the same areas and same times in an attempt to bring the people and police closer together.

We need your help with the awesome task of crime prevention and apprehension. We have been expected to do the job alone for so long, it's really hard to erase the attitude of, "I don't want to become involved." All too often we have investigated crimes when a neighbor would say, "Well, I saw a strange vehicle, but I didn't want to call the police," or wanted to wait until the neighbor came home before calling.

It's your town too. Get involved with crime prevention and apprehension. We need your help.

Edward B. Garone
Chief of Police

Yearly Report — Humane Officer

It has been quite a year in the Town of Derry for the Humane Officer. I would hate to say the Town has gone to the dogs, but it's beginning to look as though it could.

The dog population is ever increasing as well as the dog problems.

I received 3,143 dog complaints during the year. There were 47 dog bites reported to me, I picked up 409 dogs, and about 100 of them were put to sleep for lack of an owner.

Many restraining orders and nuisance abatements were issued, along with many orders to get dogs licensed.

The state has initiated a new set of laws regarding dogs, and now have raised the license fees and fines as well.

It now costs \$6.00 to license an unaltered male dog, \$6.50 to license an unspayed female, and \$3.50 to license either sex, which has been altered. The penalty is now \$1.00 per month for every month your dog remains unlicensed.

The new nuisance abatement forms now carry civil forfeitures as well, and after receiving three of those in one year, the owner of the offending dog goes to court. Just like in Baseball now, three strikes and you're out!

The new drains were installed during the year down at the Dog Pound, to carry the debris from the runs into a tank now, instead of out onto the ground, and this makes for a much cleaner, and better smelling area down at the canine hotel.

The town has a dog control ordinance, as well as the state, but you'd never know it from the number of dogs that are hit by cars and removed daily from the roads, by the Humane Officer as well as the Highway Department. They pick up numerous dogs almost every day that have been struck down by cars simply because they are not kept on their own property. It is becoming increasingly difficult for me to keep up with the number of dogs running loose in our community, since I get

one area cleared and they are let run in another. The fee for bailing out a dog, once it has been picked up is \$10.00 plus \$3.00 per day for every day over one that it remains at the pound, and I cannot tell you how many people pay more than once for the same dog. It seems they never learn.

I sincerely hope that 1978 will be a better year for cooperation in the dog world and thank all you people who gave me a helping hand in 1977, especially the people who donated the cloth material for bedding on the cold pound floor for the unfortunate dogs that had to spend seven days on the cement.

Florence Ouellette,
Humane Officer

Building Inspector/Health Officer

We have issued a total of 638 permits in 1977 and 234 of these permits were for single family or duplex homes with a construction cost of \$6,676,000.

Complaints in excess of 100 were received, and action in some form or another was taken under the duties of the Health Officer.---

Through the consent and support of the Board of Selectmen and the involvement and assistance of the Derry Police Department, my office has been able to correct violations of Zoning, Building or Health Ordinances at the District Court level and we shall continue this practice in the future.

We have had good results by using the Housing Maintenance Code when responding to rental property complaints from tenants or landlords instead of classifying those complaints as health violations.

I believe that we have been capable of assisting more citizens with their complaints, questions or problems this year than in prior years and we will continue this practice by responding to each item by its priority.

In the interest of the Citizens of Derry,
James F. Daley,
Building Inspector and Health Officer

Recreation and Parks Department

Many questions were raised during 1977, as to why we do some things the way we do. Of course it is impossible to answer all those questions here, due to time and space limitations, but we do invite anyone to come and see us to seek the answers they need. *Constructive* criticism is always solicited, but the ongoing inquisition has everyone up tight. Continuing litigation has prevented the construction of the new tennis courts, even though the town meeting voted again, their approval to build them. Delaying tactics have also set back other projects approved by the citizens at the town meeting. But we do the best we can with what we have available and still do what the public demands. So, sometimes we find ourselves in that proverbial spot between a rock and a hard place.

Last year we set goals and accomplishments as it was so well received, we thought we would try it again. Our goals for 1977 were established through staff discussions from various citizen groups who, participate in our different programs. The revised goals for 1977 were: 1(Construct, as per the vote at 1977 Town Meeting, 4 tennis courts and support facilities with

\$37,000, BOR included. 2) Adjust program and personnel to stay within the department income level to continue same input of tax relief. Budget cuts voted at Town Meeting. 3) Complete minimum capital improvements to the best use for the least amount. 4) Propose additional employees in the areas of: girls and women's programs, teen room supervisor; security service at West Side community Center and Alexander-Carr and program co-ordinator. 5) Institute adjustments in summer playground program, i.e. earlier openings and closings, movies, rotate S.P.E.D.Y. work crews including maintenance. 6) Continue utilization of manpower personnel, but be more particular in our choice of employees. Title VI project also. 7) Assist various sesquicentennial celebration projects, militia and historical society. 8) Increase services to senior citizens, handicapped and females. 9) Establish performance budget to augment regular budget. 10) Extend renovations at West Side Community Center through teenage room, work on director's office, floors and some hot top and painting outside building. 11) Improve maintenance by: build low trailer for transporting mowing machine, goal etc.; upkeep present level of vehicles (1 car, 1 jeep, 2 pick-ups and 2 tractors), 12) Maintain a work-relationship with the school department to the benefit of those programs held in and on school facilities. 13) Search for additional sources of funding to keep the cost to the taxpayer as low as possible. 14) Re-define Diane's job description and retitle for her position to include work with senior citizens, etc. 15) Better organize the many off hour duties being heaped upon the department. So we may complete such projects as the raft and teaching stations at Hood Park and the mini park at Veterans. 16) Establish new programs for girls and women, such as pillow polo, field hockey or similar activities. Cultural too like arts and crafts or music. 17) Create some "vest pocket" parks with equipment on town owned land in the outlying districts. 18) Complete emergency repairs to damaged back stops at Veterans and O'Hara fields. Help school with damaged back stop and Buckley Field.

The accomplishments for 1977 were; We have entered into the numbers game, since that seems to be the "game" some people want to play. To us, the attendance figures are only an indication of the popularity of some programs. Of course they do not reflect all the use the public makes of public facilities, only the attendance at organized activities. Here are those figures:

These figures show you, that the utilization total was 2,004, were as the participation totals were 102,280.

The annual list of programs reflects the cut in our budget. We adjusted accordingly.

Questions raised concerning fees and charges were answered by a state wide survey on the subject. We are average in our approach to the practice of fees and charges.

An increase in the participation of some programs was dramatic, as much as 100%. Grasshopper baseball was among the highest.

Continuation of cooperation with the Derry School District and Pinkerton Academy finds us lining the playing fields for all athletic programs, with the schools paying for materials and we providing the labor, skill and equipment to do the job. Those

For our own programs, we mark the surfaces for major and minor little league, men's softball league, women's softball games, ladybugs softball, grasshopper baseball, legion baseball, Babe Ruth baseball, men's touch football and boy's flag football. Some days we do as many as 9 areas in one day. In the busiest season between May to November, our 500 times we prepare playing fields.

Hood Park opened earlier last year than ever before and closed earlier also, but the swimming continued.

Continued utilization of the purchase requisition system has taken a lot more time and effort for the traditional paper work, but we have complied completely.

More use has been made of the facilities in the West Side Community Center. It should be noted that in an agreement between the town and the West Side Community Center Advisory Board, the town provides only insurance, water and snow removal for the center. While the operating expenses (heat, lights, maintenance, etc.) are paid for by donations and income generated by the West Side Community Center, Inc.

The "New" low cost playground at Veteran's Field was finally finished.

A freak ice storm in late winter provided us with more problems, by destroying fences and back-stops at our playing areas. As a result, we put up new fences and back-stops to replace those blown down in the storm. The areas were O'Hara

Field and Veteran's Field.

Enlarged the playing surface at Veteran's Field.

Built a new raft and two teaching stations for Hood Pond.

Expanded the parking area at Hood Park.

Utilized more volunteers than ever, in our programs, as coaches, officials and helpers.

Apply for funds to participate in projects which, would provide personnel for girls and womens programs, "vest pocket" park construction and conservation of our existing town owned areas.

Worked on performance budget to help us see how much the different activities cost per participant.

Increased income over last years level.

Continued utilization of manpower personnel, under the CETA program and SPEDY summer program.

Began using older workers, under federally funded programs: Senior Community Employment and Green Thumb.

Renovations at West Side Community Center have been slow, but steady.

Compliance with fire, building and insurance regulations, has been on going, but we have done everything possible within the money available.

Assisted various organizations with, sesquicentennial celebrations ie; fireworks, militia and book.

Built a trailer for transportation of our maintenance equipment.

Our goals for 1978 include: 1) Improve communications with all other town agencies as well as the citizens of our town, so some sort of normalcy can return us to serving the public everyday in every way. 2) Continue to increase the income of the department so the cost to the tax payer is decreased. 3) Complete renovations at West Side Community Center already started including hallways, teen room, director's office, front entrance, outside painting and change over of heating system, utilizing CETA "Work id Dignity" labor and funds from United Way. 4) Improve the lighting at Veterans Field and Alexander-Carr Playground. 5) Build the tennis courts finally, to comply with the latest vote of the town meeting to do so. 6) Comply with Title 9 mandate to provide more and equal programs and facilities for females. 7) Apply for CETA projects in the areas of program supervision, marking and development of new park areas on town owned property. 8) Use Green Thumb and Senior Community Employment programs for older citizens utilization. 9) Increase our permanent maintenance employees by one laborer. 10) Replace one vehicle (the Plymouth has 118,00 on it and needs to be replaced soon). 11) Set up a new system of record keeping, so that all information will be available in detail for everyone. 12) Install lights at Alexander-Carr on the horseshoe courts to provide many more hours of use for that facility. 13) Construct another 60' ball diamond at South Range School. 14) Establish a list of priorities for major projects for the next five years. 15) Continue a satisfactory working relationship with the schools to benefit all citizens of our community who participate in activities held in those facilities. 16) Cooperate with other town departments to more efficiently serve the public in those areas demanded by them. 17) Increase our cultural programs available for all ages. 18) Coordinate studies and surveys of the New England Municipal Center, THE Greater Derry JayCees and town goals' committee to determine the greatest need of the largest number. 19) Participate in various professional

improvement activities for all staff members. 20) Plan for future demands created by increased leisure, energy crises and population changes. 21) Work out a low cost building schedule involving natural materials and inexpensive equipment. 22) Assist organizations in setting up a diversity of leisure pursuits. 23) Serve the older citizens, handicapped and special populations with better programs. 24) Provide leisure activities for all citizens of our town without discrimination.

Report of the Bicentennial Committee

While 1976 was the Bicentennial year, the Derry Bicentennial Committee's activities continued in 1977 through the medium of the Derry Historic Research Committee. The latter committee was instituted in 1975 with Warrington B. Willis as chairman and was charged with writing an updated history of Derry for the Bicentennial. Until this time, there never had been written a history of Derry as a separate municipality, although the Rev. E. L. Parker's *History of Londonderry* (originally published in 1851) had encompassed the early history of our community and George Willey's book *Book of Nutfield* (published 1895) had further illustrated the history of the Derry-Londonderry area.

"Bill" Willis prepared an outline for the new Derry history and several persons volunteered to write various chapters. The committee met monthly throughout 1975 and early 1976. Its accomplishments consisted of considerable research and some completed manuscript. The committee became leaderless in the spring of 1976 when Bill Willis had to resign from the book committee due to his changed working hours with the U. S. Postal Service.

In mid-1976, Richard Hoisington, a member of the committee, assumed the chairmanship. In September, Phoenix Publishing of Caanan, was tentatively engaged to publish the history book and from then on the project was stepped up. Phoenix is a small company that specializes in publishing town histories and other low volume editions on varied subjects. Its facilities are geared to dealing with authors on a personal basis — a particular advantage when working with town history committees.

Since it was now impossible to complete a hard cover book in the Bicentennial year, the focus of the book was altered. As 1977 would mark the 150th anniversary of the separation of Derry and Londonderry into two municipalities, it was decided to prepare a history of Derry from 1827 to 1977. 'in casting about for a title and theme for the book, the title "From Turnpike to Interstate" was suggested, as so much of Derry's history has evolved around various modes of transportation. From then on, committee members settled down to the serious business of writing. A publication date of July 2, 1977 was scheduled as this would be the town's 150th birthday anniversary. Ralph S. Bonner prepared a Susquecentennial Proclamation that was appropriately signed by the Selectmen and Town Clerk.

The book committee requested an appropriation of \$12,500 from the town to publish the history book. This amount was approved by the budget committee and then by the voters at town meeting. It was explained that as the history books were sold the money would be gradually returned to the town.

It was soon realized that the book could not be published by the designated July 2 date because more manuscript needed to be prepared. Fortunately, a few more persons volunteered to assist the book committee and finally the bulk of it was completed by late July.

A pre-publication sale of *From Turnpike to Interstate* was begun in August offering a 20% discount off the retail price of \$12.00 per copy. In the following two months nearly 250 orders were received.

The new publication date of December 1 was expected to be met, but ensuing last minute problems on the printing portion of the book caused it to be missed. At the end of 1977, the 1,000 volumes had been received from the bindery and an official First Day Sale was scheduled for January 7, 1978.

The members of the Derry Historic Research Committee are: Richard Hoisington, chairman, Elizabeth M. Low, Kenneth W. Davis, Grant E. Davis, Olive M. Abbott, Edward C. Newell, Ralph S. Bonner, Jr., Martine M. Banmister, Donald F. Ball, Lorraine R. Kimball, Harriett A. Durward, Conrad L. Quimby, Evangeline G. Palmer, Cheryl A. Lynch, Mildred A. Gage and Donald C. Huston. Benjamin C. Newell prepared several maps to illustrate the book. Many persons in Derry and elsewhere provided the committee with historical material and photographs for the book and without their valued assistance the book could not have been completed.

The Molly Reid Chapter, D.A.R. asked if the book could be dedicated to the late Harriett Chase Newell and the committee wholeheartedly concurred with this request. Harriett Newell was Derry's unofficial historian for many years and if she had been living while the history book was being prepared, she would have been a very active participant in the project.

Finally, it should be noted that the Bicentennial will not officially end until 1983 - the 200th anniversary of the end of the American Revolution. The Derry Militia, organized in 1976, continues its activities and is making tentative plans to be in France for that country's Bicentennial later on in this century. As France became the United States strongest ally and aided our fledgling republic during the darkest days of the American Revolution, it is proper that Americans of 20th century provide fitting tribute to France during its celebration.

The lasting memorial of the Bicentennial is the Historic Museum located in the old Central Fire Station. It is under the guidance of the Derry Historical Society and Museum. Incidental sales items from the Bicentennial have been turned over to the Society for maintenance of the museum. Visitors are always welcome as are donations of historic value.

The Derry Bicentennial Committee accomplished two lasting reminders — a museum and a history book.

Respectfully submitted,

Derry Town Government Study Committee

FINAL REPORT

ABSTRACT

For the third time in fourteen years, a committee was formed at the direction of the Town Meeting to study alternate

forms of Government for the Town. The Committee reporting now was formed as a result of a vote at the Annual Town Meeting in March 1976.

The Committee reviewed the alternative forms of municipal government as they are currently in use throughout the United States in light of the existing General Laws of New Hampshire. This report embodies the significant points of the study and the recommendations of the Committee as the result of a comparative analysis.

The committee concludes that:

1. *The Town Meeting Form should be eliminated in Derry.*
2. *The Town Meeting should vote to see if the Town is in favor of a change.*
3. *If the Town is in favor of a change, then a Charter Commission should be appointed to construct a Council-Manager Town Government.*

The report is divided into three sections: First is a discussion of the Committee's history; Second is the Recommendations, and Third are the conclusions.

HISTORY

For the third time in fourteen years, a Committee was formed at the direction of the Town Meeting by the Meeting of March 1976. The committee was charged with the task of studying other forms of Municipal Government practised in the United States and determine if any were practical for the Town of Derry. At the Town Meeting in 1977, the voters overwhelmingly endorsed the continuation of that Committee's work.

The Committee, which was open to volunteers, consisted of nine members.

Over the two year life of the Committee, it has studied all forms of existing municipal government, including Strong-Mayor, Weak-Mayor, Council-Manager, Commission, Representative Town Meeting and Modified Town Meeting. Deviations of these forms were discussed at length and the Committee concluded that the governing body, in order to be effective, should be large enough to be representative, but small enough to be functional.

To construct a representative legislature, the Committee decided that the Town should be divided into four districts for the election of district representatives. Also, there should be several representatives elected on an at-large basis to insure that the Town as a whole has representation. The Committee has constructed representative districts.

One objective which the Committee attacked was a reduction in the number and length of public meetings. It was recognized that with the numerous Boards and Committees in Town it was a nearly impossible task for any voter to attend to all of the affairs which are regularly discussed at Public Hearings.

The Town Meeting as originally constructed was to have three "Town Fathers" to attend to Town affairs between annual meetings. The Town Meeting was to be the ultimate authority with power vested in the public assembly. With the adoption of many Municipal Acts by the Legislature and accepted by the Town, as well as the increasing federalization at both the State and National levels, the Town Meeting has become purely symbolic.

To confirm this idea one need only look at the meeting votes which have been reversed by Court decrees and the negation of a clear intent by a handful of voters requesting a two-thirds majority. Annually, three to four hundred voters (out of ap-

proximately 8000) attend some of Town Meeting. Attendance at the other bodies is even less. Practically, if more than 15% of the 8000 voters were to turn out for the Town Meeting, there would be no assembly hall big enough.

RECOMMENDATIONS

The Town Government Study Committee hereby recommends that the Town Meeting change its form of Government from the present Town Meeting form to a Council-Manager form through means of Special Legislation. If the route of special legislation fails, the form should be changed pursuant to RSA 49-a provision for Council-Manager, or wait until the Legislature provides "Home Rule" enabling legislation.

In view of the problems raised in the first part the Committee recommends the following composition:

1. *Council* — The Council will be the principle legislative authority within the Town. It should be composed of 4 District Representatives and several at-large members, total membership not to exceed 11 or be below 5 and must be an odd number.

Comment: District Representatives would insure a voice for each area of Derry. The at-large members would represent the Town as a whole. The size is viewed to be of optimum efficiency.

2. *Appointment* — The Council will appoint(remove) and supervise the Town Manager.

Comment: An appointed Manager provides greater assurance of selecting a trained professional administrator.

3. *Budget* — Council is responsible for final preparation and approval of the budget.

Comment: This element will merge the present dual budget preparation duties into a single group fixing the responsibility for both its preparation and its implementation. Final approval is reached only after several public hearings.

4. *Boards and Commissions* — Council will appoint all Boards, Commissions and any other non-elective positions.

Comment: The present system of appointment appears to be functioning efficiently.

5. *Referendum* — Council actions and Councilors are subject to referendum and recall.

Comment: Removal from office would be allowed for gross misconduct. Reversal of Council votes would be allowed for legislative injustices.

6. *Council President* — Council will elect its own presiding officer to provide leadership at its meetings and be the nominal representative of the Town.

Comment: Guidance of the Council to act on the urgency of situations must be provided for any government to perform effectively.

7. *Fire Districts* — Fire Districts should be incorporated under Town Government and the Fire Marshal should be subordinate to the Town Manager.

Comment: Centralization of the resources and manpower is essential to more effectively safeguard the lives and property of citizens.

8. *Conflict-of-Interest* — Provide a Town conflict of interest measure.

Comment: Provide the protection afforded Cities under 49-A:82.

9. *Division of Authority* — Town Manager has supervisory authority over all appointed officials. All elected officials will serve Council.

Comment: This division is effective to provide daily supervision of Town affairs and prevent supervision of elected officials by an appointed official.

10. *School District* — The School District is to remain a separate and distinct body.

Comment: This separation should exist to maintain the current quality of education, and to fix budgetary responsibility.

The measures required to accomplish the change are:

1. If the Town is desirous of change as determined by vote of the Town Meeting, a Charter Commission should be appointed to construct a Charter in accordance with this report and the General Law to be submitted for legislative approval as Special Legislation for the Town of Derry.

2. If after the Town determines it is desirous of change the Legislature should adopt a "Home Rule" enabling measure, the Town should proceed in accordance with the legislation. If a Charter Commission has been formed at that time, it should abide by that law.

3. As a final alternative, if Special Legislation fails and "Home Rule" has not been adopted, the Town should incorporate as a "City" under RSA 49-A:42 provisions for Council-Manager.

CONCLUSIONS

1. We the Committee conclude that the recommendations and conclusions of this report be published to allow sufficient notice and public discussion of the issues.

2. We the Committee conclude that the Town Government should be changed for the following reasons:

- Town Meeting has become impractical, inefficient and burdensome in an expanding community.
- Town Meeting fails to decide matters representatively.
- Town Meeting and its operating procedures weaken the authority and bargaining power of the Town Authority making it ineffective in dealing with essential problems.
- The rule of Town Meetings usually becomes anti-majoritarian as the result of the rules of the meeting.

3. We the Committee conclude that there shall be an article on the Town Meeting Warrant requesting voters to vote yea or nay on whether or not the form of Town Government should be changed. We the Committee further conclude that if the Article aforementioned shall pass, then at the deliberative session of the Town Meeting there shall be an article to see if the Town will approve the creation of a Charter Commission to be appointed by the Moderator in accordance with procedures listed therein. If the Charter Commission is created then the proposed charter should be submitted to the Town for its approval at the 1979 Town Meeting.

4. We the Committee finally conclude the aforesaid to be in the best interests of Derry and that they be adopted.

Report of the Southern New Hampshire Planning Commission

Regional Planning Agencies, such as, the Southern New Hampshire Planning Commission are responsible for basic planning activities throughout New Hampshire. Each agency has specific area for which it is responsible.

The Southern New Hampshire Planning Commission is responsible for preparing coordinated regional plans of its region for land use, transportation, water supply, sewerage, public buildings and the like. Regional plans to be effective *must provide for future growth* in those areas where such growth can most efficiently occur. The regional planning process *must* include an objective evaluation of differing proposals and *must* include public consideration of unpopular or minority viewpoints.

Regional planning provides up-to-date data needed by local officials to make decisions regarding zoning amendments, street and road improvements, sewer locations, and location of public facilities, to name a few.

DERRY REPRESENTATIVES

Mr. Frederick Tompkins, Chairman, Mr. Benjamin Newell and Mrs. Carolyn Johnson represent Derry as voting members of the Southern New Hampshire Planning Commission. Mr. Frederick Tompkins is also a member of the Commission's Executive and Personnel Committees.

TECHNICAL ASSISTANCE

The Southern New Hampshire Planning Commission provided these direct services to Derry last year as part of their Local Technical Assistance Program:

- Presented expanded list of basic and contract Commission
- Provided updated list of State planning legislation changes.
- Prepared "Environmental Review Record" for the acquisition of the Carrie White/Murdock/Patten Farm.
- Prepared critique of development proposal.
- Coordinated preparation of Community Development Block Grant proposal with the U. S. Department of Housing and Urban Development.

REGIONAL PLANNING

Regional planning studies conducted by the Southern New Hampshire Planning Commission over the past year include:

Land Use — Completion of Land Use Plan 2000, a long range plan to assist communities in their land use planning efforts.

Citizen involvement in Derry played a major role in shaping the plan's recommendations and policies.

Housing — The Regional Housing Plan was completed.

Transportation — Reports generated include:

- Land Use Update FY 1977, MMPS Area.
- Population and Land Use Projections 1985 and 2000, MMPS Area.
- Population Estimates FY 1977, MMPS Area
- MMPS Area Employment Projections 1985 and 2000
- MMPS Area Employment, Unified Work Program FY 1977
- School Enrollment Projections in MMPS Area 1985 and 2000
- Transportation Planning Annual Report 1977
- Maps and Publications, 1977 Update

THE COMING YEAR

During the coming year, member communities will receive detailed assistance relative to recommended procedures for implementation of the regional land use and housing plans. Local technical assistance will include the development of

model ordinances; modernization of subdivision regulations and identification of area where growth should and should not occur.

Recycling Program

June of 1977 saw the advent of a program to recycle glass, tin cans, newspaper, cardboard and scrap metals. The glass bins were altered to permit separation of white, green and brown glass. Thousands of "Tin" cans were collected and found their way back into useful service in the form of scrap metal. Newspaper and cardboard collections and shipments amounted to some 32 ton. Scrap metals represented some eleven shipments totalling almost fifty ton. In addition another truck dock was begun. When completed it will provide a more convenient means of collecting scrap metals.

A shelter shed has been constructed, at no cost to the taxpayer, adjacent to the newspaper trailer protecting newspapers deposited during inclement weather after the recycling operator has completed his 40 hour work week.

While the program is still in its infancy, it has proven that with proper management many materials, that would otherwise be totally wasted, can be reused (Recycled) and return a fair monetary value to the Town. Cash value will exceed \$2,100.

Another project of the Recycling Director has been the study of a more appropriate way of disposing of Derry's solid waste. Preliminary findings indicate the possibility of a system which will be environmentally and ecologically more appropriate than the present system, and at the same time be nearly self-supporting financially.

REPORT TO THE TOWN OF DERRY

For the Period 7/1/76 - 6/30/77

From July 1, 1976 to June 30, 1977, this agency continued to provide the largest portion of its health services to Derry residents. The population of Derry makes up 42% of the total population served by the agency now, but the service required during this period was 53%. This is not surprising since the agency has been known in Derry much longer. Other factors which account for increased utilization in Derry are our office accessibility to "walk-in" inquiries and the greater number of other human service agencies located in Derry which make referrals to us.

The agency now provides three general categories of health services:

1. Home Visits (nursing, physical therapy, homemaking and home health aide);
2. Clinic Type Services (immunization, blood pressure screening, special clinics and office visits for TB testing and blood pressure checks);
3. Special Class Instruction (Expectant Parent classes).

Of these, the largest agency effort is that of providing home visits. Total home visits made to Derry residents over the past

Derry Water Department Report

The Water Department had a difficult but good year. The year started off with many major problems caused by deep frost. We had one major main break, numerous service leaks, damaged hydrants and frozen service lines. Department personnel developed an improved technique for thawing frozen lines using hot water and pressure. We were able to restore service quickly for all of our customers. Repairs were made as expeditiously as possible and all repairs were completed in the Spring. 620 feet of 8 inch mains were laid on Broadway from Wyman Street to Fordway, seven services were replaced and a small hydrant was replaced by a 6 inch hydrant. Water in this area is no longer rusty, fire protection is improved and there is better flow to the Holmes Street Tank. Another 60 feet of 8 inch pipe was laid on Crystal Avenue to connect two dead ended mains, resulting in improved flow to and from the two million gallon tank off Manchester Road. Further, a total of 89 house services were installed replacing old galvanized iron pipe or providing water to new houses.

178 house meters and outside readers were installed in new houses or as replacements. The department has a planned program of replacing worn house meters with modern, high accuracy meters over a period of about ten years. These meters can be repaired by simply replacing the damaged component. The meter should then be good for another ten years. The replacement program should be completed in 1980 and the test and repair phase will start in the following year. The Outside Readers permit meter reading without disturbing the home owner and reduce the cost of this task. Good progress was made with out standardization program. Currently we procure only five sizes of meters which greatly simplifies maintenance work.

Much work was done in maintaining the wells of this Water Department. Fordway Wells were scrubbed and cleaned by department personnel. Londonderry Well No. 1 was completely overhauled, chemically cleaned and the pump rebuilt by Layne, New England Company who made the initial installation. Upon completion the original capacity of this well had been restored.

A program aimed at renewing our Fordway Pumping Station by installing a larger pump and improved controls is under way and will be completed in 1978.

We continue to cooperate with the N.H. Water Supply & Pollution Control Commission in monitoring and testing our water and are pleased to note that the Town has an ample supply of good water at this time.

Derry Wastewater Department Report

The operation of the Treatment Plant (Lagoons and Pumping Station) and the Collection System (sewer and lift stations) continues to be a major challenge. Even though aerators are now suspended from overhead cables, two units capsized. Both were promptly righted again and motors replaced by department personnel who went out on the Lagoon by boat. The cause for the accident is believed to be high water. Wastewater flowed in at more than twice the normal rate, raising the level of the No. 1 Lagoon and appreciably reducing the usefulness of overhead cables. Corrective action has been taken but the possibility exists that there may be partial capsizing of an aerator in the presence of strong winds, bad icing and excessive flows.

The Chlorination Facility was overhauled and simplified. One of two feeder lines now operates solely on gravity. All leaks have been eliminated. The Sewer Pumping Station is in its second year and gives reliable and trouble free operation. Generally the Treatment Plant is running well as evidenced by consistently good effluents and absence of bad odors.

The major advance of our wastewater treatment organization was the transfer of the Laboratory to a new facility in the Bean Building and the hiring of a college educated Biochemist. As a result we are well along in having a superior capability for water and wastewater testing. This capability is essential for good control over the treatment process and for compliance with the requirements of the Clean Water Act and the Safe Drinking Water Act.

Environmental Engineers conducted a Sewer System Evaluation Survey and submitted a report on their investigation. Infiltration/inflow problems are defined and corrective actions are recommended. Naturally, the department favors sewer rehabilitation since we are troubled by high flows to the Treatment Plant.

Several sewers were rodded. Lift station pumps and check valves were cleaned and repaired as needed. More and more maintenance has to be performed on these stations as they become older.

It continues to be the objective of the department to keep equipment in satisfactory operation and to treat wastewater at minimum cost per gallon.

DERRY FIRE DEPARTMENT

The Derry Fire Prevention Bureau was officially formed July 1, 1976, consisting of one (1) full-time Fire Prevention Officer. In May of 1977 an inspector was added to the Bureau due to the increase in the work load.

The Fire Prevention Bureau is charged with many responsibilities such as: Fire Safety inspections of all apartment buildings, office buildings, mercantile, health facilities, business establishments, schools and other public places of assembly. In buildings used for public assembly, permits are issued by the inspectors stating the maximum occupancy load allowed by the Life Safety Code. The Bureau is also available for any home inspection upon request.

The installation of any new oil burning equipment must be inspected and passed by the Bureau. In 1976, the above mentioned inspections averaged fifty-three (53) per month. Today, the Bureau averages eighty-seven (87) per month.

On all new construction of public buildings or additions to existing ones, plans must be submitted to the Board for review by the inspectors. If needed, modifications are then made on the existing plans to meet Life Safety Standards. The plans are then sent back to the contractor with the proposed changes.

Another function of the Fire Prevention Bureau is public education in Fire Safety and Prevention. In the spring of 1977, a Fire Prevention program was established for the elementary school level. The children were introduced to a character known as "Captain Noburn". This was accomplished by both slide presentations and film strips. His message dealt with both fire hazards and escape procedures. This was a three (3) part series. The program was well received by both the students and teachers alike and it is the Bureau's intention to expand this to a six (6) part series in the coming year. This program was seen by approximately two thousand (2,000) children. It is our hope that by instructing them at an early age, they will grow with Fire Prevention as a way of life.

Programs are also presented to hospital and nursing home personnel on effective fire extinguishing methods, evacuation techniques and disaster procedures. This is accomplished through lectures, actual drills, films and displays. All personnel

are encouraged to actively participate as they are subject to unscheduled fire drills twenty-four (24) hours a day.

Since its inception, the Bureau by request, has given some twenty(20) odd lectures on various fire related subjects such as: installation of wood stoves and proper fuel to use, smoke detectors and home safety factors.

The Fire Prevention Bureau is charged with the service, maintenance and supervision of some eighty-four (84) fire alarm boxes and aerial cables within the Fire District. Twice a year all fire alarm boxes are tested for proper operation and test results are recorded.

Finally and most important, the Fire Prevention Bureau is charged with arson investigation. In today's society, arson is an ever increasing crime. An extensive training in arson investigation is mandatory. One or all of the inspectors to date have been trained through the New Hampshire State Fire Marshal's Office, the New Hampshire State Police Forensic Laboratory, attended several seminars sponsored by the Federal Bureau of Investigation, Rutgers University and are currently enrolled in the New Hampshire Technical Institute's Fire Science course to deal with the arson problem. At any fire, it is the function of the Bureau to establish the origin and cause of the fire. If the cause is determined incendiary, it is the responsibility of the inspectors to question all individuals concerned, to collect all direct physical evidence and submit such evidence to the New Hampshire State Police Forensic Laboratory for analysis. If needed, outside agencies such as the local police department of the New Hampshire State Fire Marshal's Office are requested to assist in investigations. It is the responsibility of the Bureau to work closely with these agencies.

It is the objective of the Derry Fire Department Fire Prevention Bureau to reduce the loss of life and property by fire, through regulated inspections and Fire Safety public education.

In accordance with the foregoing warrant, a meeting of the East Derry Fire Precinct was held on Wednesday, March 23, 1977 at 8:00 P.M. at the East Derry Fire Station. The meeting was called to order at 8 P.M. by Moderator Bruce Theriault.

Moderator Theriault said the Pledge of Allegiance, read the Rules of the

Meeting, and introduced the Officers of the District and the members of the Budget Committee. Mr. Theriault proceeded to read the warrant and stated Article 1 has been disposed of at the election, March 8, 1977, with the following candidates elected to office: Fire Ward, Arthur E. Reynolds; Moderator, Bruce Theriault; Clerk, Anna G. Ludwig; Auditor, Paul A.

Gibbons.

THE MODERATOR: read Article 2. To hear the financial report of the Treasurer. You have a copy of the Treasurer's report contained within the mimeographed sheets. I'll entertain a motion to accept the Treasurer's report.

MR. HIRST. Moved to accept the Treasurer's report.

THE MODERATOR. read Article 3. To hear the Clerk's Report. You have a copy of the Clerk's report contained within the mimeographed sheets. I'm going to dispense with reading of the minutes. Is everyone in favor of accepting the minutes as printed, barring and omissions? Let the record show the minutes were accepted unanimously.

MR. KENNEDY. Seconded the motion.

THE MODERATOR. Asked if there was any discussion.

MR. GEISSENHAINER. I wish Chief Miller would explain why we need this Contingency Fund.

MR. MILLER. Basically we established the Capital Reserve Fund, which we are allowed by State Law. Secondly the amount of money we move from other accounts, because of emergencies that occur throughout the year, gets complicated. We decided to establish this account. The money will not be spent, unless we occur something that has been unpredictable throughout the year, and if we do, it's quite clear we have to explain it to you and the budget committee. It also helps us budget more accurately, rather than drawing money from other accounts and spending for things we didn't anticipate during the year. THE MODERATOR. Does that answer your question? Is there any further discussion? Being no further discussion, we'll put it to a vote. It was a vote in the affirmative.

THE MODERATOR. read Article 7. To determine and fix the Salaries of the precinct Officers or agent of the Precinct.

MR. HIRST. Moved we accept the article as read.

MR. LUDWIG. Seconded the motion.

THE MODERATOR. Is there any discussion.

MR. REYNOLDS. Seconded the amendment.

THE MODERATOR. All those in favor of amending Article 7 to read: To fix \$1,180.00 as the salaries of the Precinct Officers or agent of the Precinct. An affirmative vote was taken.

THE MODERATOR. read Article 8. To see what sum of money the Precinct will raise and appropriate for the East Derry Fire Precinct the same to be expended under the direction of the Fire Wards.

MR. HIRST. Moved to accept as read.

MR. CASSIDY. Seconded the motion.

THE MODERATOR. Any discussion?

MR. MILLER. I would like to amend that Article to read: \$18,477.80 to be the sum of money the Precinct will raise and appropriate for the East Derry Fire Precinct the same to be expended under the direction of the Fire Wards.

MR. ORCHARD. Seconded. THE MODERATOR. Any questions? Be votewas in the affirmative. Article 8 reading: \$180,477.80 being the sum of money the Precinct will raise and appropriate for the East Derry Fire Precinct the same to be expended under the direction of the Fire Wards

MR. MILLER. I would like to make a motion that we pass the revenues as decided to be \$186,741.52

MR. HIRST. Seconded the motion.

THE MODERATOR. Is there any discussion? None appearing, we'll vote on the question. The question is to accept the Revenues as \$186,741.52. The vote was in the affirmative.

MR. ORCHARD. Moved to accept the article as read.

Mr. Ludwig. Seconded.

THE MODERATOR. As there was no discussion the motion was put to a vote and passed.

THE MODERATOR. read Article 12. To transact any other business that may legally come before this meeting including the appointment of committees.

MR. CASSIDY. Made a motion for a Study Committee to be appointed to determine the feasibility or unfeasibility of East Derry to secede from the Town of Derry.

MR. LUDWIG. Seconded.

THE MODERATOR. Any discussion.

MRS. TRUE. I would like to know the reason why?

MR. CASSIDY. The tax rate is going up because of Derry. I feel East Derry can do better. To keep it a rural area. We have our own Fire Department. We are not getting up here in East Derry what the taxpayers are paying for. Also, a lot of things we are putting money into that we do not get. I feel if we have a Study Committee, we would have a better idea of the possibility and advantages of seceding.

Further discussion ensued concerning the Study Committee.

THE MODERATOR. The motion to investigate the possibility of East Derry seceding from the Town of Derry, and forming its own Town. The motion was voted on in the affirmative, and Mr. Cassidy was appointed chairman of a three man committee. The committee will report at the next annual meeting or call a special meeting before that. Anything more to come before the meeting?

MRS. O'Connor. Remarkd on the quick way the budget was passed and asked why \$28,940.00 for three new men?

MR. MILLER. The \$28,940.00 for the three new additional men is strictly manpower men only. I have requested from the Rockingham/Strafford county Manpower for three additional men. If we get them, their the people that pay for it, we don't. If we don't get it, we don't pay for it.

THE MODERATOR. Is there any further business?

MR. FERLAND. I would like to know what happened to your committee regarding a merger.

MR. MILLER. A committee was formed. We met with the Derry Fire Commissioners and before we went into any more study, we came up with a plan. We would like to try for a year, before asking for any concrete information into it. We have a mutual response plan for the questionable areas of district lines. It has worked out very well. Now after we get this information behind us, I think we can sit down honestly, and make some kind of analysis on whether we should or should not merge.

THE MODERATOR: Is there any further business? Being no further business to come before this meeting, I would like to entertain a motion to adjourn.

MR. LUDWIG. Motion to adjourn the meeting.

MR. BUTTERFIELD. Seconded.

THE MODERATOR. All those in favor of adjourning please rise. This meeting is adjourned at 8:32 P.M.

The Clerk certifies that a letter was received from Paul A. Gibbons, Auditor stating that the accounts and records of the East Derry Fire District have been found in good order.

(Derry Visiting Nurse Assoc. — Continued from page 41)

three years are:

1974-1975 — 2798
1975-1976 — 3465
1976-1977 — 3730

During 1976-1977, the agency responded to an increased demand for two kinds of services especially, physical therapy and expectant parent classes. A second part-time physical therapist was added to our staff and expectant parent classes were increased from two series of classes per year to three series per year. The number of referrals and registrations into these two areas continues to increase markedly. In fact, we anticipate that the interest, enthusiasm and attendance for the Expectant Parent Classes will warrant an increase from seven to eight evenings per series and from three to four series per year in the near future. The largest number attending these classes (offered at the Alexander Eastman Hospital) are from Derry.

A major effort of the association during the fall of 1976 was the offering and coordination of local "flu clinics" as part of the national effort to prevent a major flu epidemic. There was no reimbursement from any source to the agency for this activity, which was above and beyond our regular community services.

As the agency looks forward to its 70th birthday in the spring of 1978, we do not anticipate any slackening in the need for home health care. In fact, to the contrary, as the trend towards earlier and earlier hospital discharges continues, we expect families will need more assistance to provide care to the sick in their homes and the agency will need to maintain its quality of care and staff capacity in order to meet these needs.

Joanne Millsaps, R. N.
Nurse Administrator

Auditor's Statement

August 31, 1977

Board of Directors
Derry Visiting Nurse Association
Derry, New Hampshire

I have made an examination of the balance sheet of the Derry Visiting Nurse Association as of June 30, 1977, along with the related statements of income and changes in financial position for the year then ended.

My examination was made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and other auditing procedures as I considered necessary in the circumstances.

In my opinion the accompanying financial statements present fairly the financial position of the Derry Visiting Nurse Association at June 30, 1977 and the results of operations for the year then ended in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

I wish to thank the employees of the association for the hearty co-operation extended to me and my staff during my examination.

Report of the Derry Public Library

The Derry Public Library is again pleased to announce an increase in adult and juvenile circulation and new registrations for the past year. Because of a larger book budget, more books were purchased than in previous years.

Inter-library loan cooperation remains at a good level and as this is a well developed area, we are happy to supplement our own collection with books from other libraries, thus giving additional service to our patrons. A long awaited goal was realized in August when wall to wall carpeting was installed in the Library, putting the finishing touches to the interior renovation of the building.

A copying machine was placed in the adult reading room during the summer and is well used. Specially built shelves have been made for the large collection of our large print books and this type of reading material is well patronized.

Taylor Library Report

This last year our library has been completely refurbished. The refinishing of chairs, tables and oak woodwork show off the lovely pale green walls to great advantage. New hanging plants on handcrafted macrame hangers add to our new decor. Come in and browse, everyone is welcome.

Due to reduced travel time in the State Library budget, the Bookmobile has visited us only twice during the year. From it we have borrowed four hundred and three adult fiction, sixty-eight non-fiction and forty seven juvenile volumes, making a total of five hundred and eighteen. This is far below our usual amount borrowed and we are sure it can be rectified in the coming year. The paperback book exchange continues to be a popular item.

I wish to thank the trustees for their generous cooperation and support and to express my appreciation to all our patrons for their donations of bookmarks and paperbacks.

We are open on Tuesdays and Thursdays from 2:00 until 8:00.

Respectfully Submitted,
Ruth A. Varney
Librarian

Report of the District Fire Chief and Town Forest Fire Warden

Forest fire control in New Hampshire is a joint state and town city responsibility (RSA 224).

The Director, Division of Forests and Lands (State Forester) appoints a forest fire warden and several deputy forest fire wardens in each town city upon the recommendation of local authorities.

The local forest fire warden is responsible for forest fire prevention and suppression activities in his town. He regulates the kindling of outside fires when the ground is not covered with snow by the issuance of written permits only when conditions are safe. He is responsible for suppression with the town city and state sharing the cost. Suppression costs in excess of 1/4 of 1% of the assessed valuation of the town are assumed by the state.

The state provides training for the local fire organization and helps coordinate activities between towns cities. The state also supports local forces with backup personnel, equipment and supplies for suppression and prevention.

This combination of state and local cooperation, started in 1893, works well, for New Hampshire has enjoyed one of the smallest acreage losses due to forest fires in the United States for the past 25 years.
